

The Ultimate Hand Sanitiser
World's first and only disposable air filtration that
removes 99.9% of harmful airborne pathogens

Revolutionary World First S10 Super-Bac Filter

The only 4-in-1 Anti-Bac air purifier, air fragrancer and hand dryer

- Hand Dryer
- Fragrance Booster
- Hand Sanitiser
- Air Fragrancer

Certificate of Effectiveness

I, **Dr David Coates BSc PhD** certify that I have carried out microbiological tests to establish the effectiveness of the 2 serial Antibacterial Cartridges fitted into the

Panache® S10 Industrial Hand Dryer
(Commissioned and developed by Panache Group Pty Ltd)

Tests were carried out in a male washroom in which aerial contamination with micro-organisms from different sources were present.

The 2 serial Antibacterial Cartridge system using a standard 20 second drying time, achieved a

reduction of 100%

and using a 40 second drying time achieved an average

reduction of 97.5%

across all the tests that were designed to isolate Environmental, Skin, Hair and Gut organisms.

Panache's efforts to reduce airborne bacteria has been achieved through the revolutionary, world first Super-Bac cartridge.

The Ultimate Hand Drying Procedure

Dry your hands with either paper or roller towel to remove excess water then utilise the S10 unit and sanitise your hands with 100% bacteria free air.

The Super-Bac has been tested and proven to deliver 100% anti-bac air onto the hands which means that the S10, in conjunction with paper towels and roller towels, is the ultimate solution in hand drying and sanitisation.

The global solution for ...

Hospitals, doctors, clinics, childcare centres, schools, commercial kitchens and other areas where germ and bacteria free hands are vital.

Add a fragrance to compliment the existing fragrancer in the washroom and the combination of anti-bac and fragrance makes the S10 the only solution for fresh and clean environments globally.

The only solution for safe, fresh, clean, hygienic hand drying

Panache leading the way to hand dryers, paper towels, roller towels, aerosol dispensers working hand in hand and managing washroom environments globally

Revolutionary World First

Anti-Bacterial S10 Super-Bac Filter

Complete Hand Sanitiser

Research and industry requirements has led to a need for a complete hand sanitiser. When used in conjunction with paper towels or roller towels installed in the washroom, the S10 Hand Dryer fitted with the Super-Bac cartridge provides 100% bacteria free air blown onto the hands.

This breakthrough in the hygiene industry has led to hospitals, doctors, medical clinics, industrial kitchens and other industries being able to utilise a hand dryer in these areas where hand dryers have previously not been able to deliver a hygienic hand drying solution.

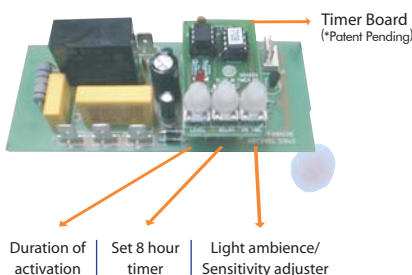

Timer Board (*Patent Pending)

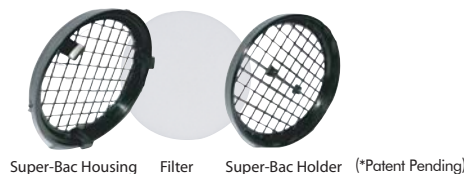

By fitting the optional timer board, the S10 becomes a programmable hand dryer which allows pre-set Anti-Bac and Fragrance dispersements.

This function allows uninterrupted dispersement of air for up to 4 minutes over intervals from 30 minutes up to 8 hours.

This allows a continuous purification and Anti-Bacterial function of the air throughout the washroom area for bacteria-free washrooms. The ambient light sensor ensures that the unit will not operate in darkness.

The Super-Bac cartridge snap fits to the fan housing quickly and simply. Open the front cover, slot in the Super-Bac cartridge and close the cover to receive 100% bacteria free air. By changing the filter once a month, your hands will be sanitised by 100% bacteria free air each and every time you use the S10.

Fragrance Options (*Patent Pending)

Available in all industry standard hygiene fragrances, the addition of fragrance to the Super-Bac filter ensures that your washroom is fragranced each and every time the unit is used.

If an air freshner unit already exists within the washroom, the S10 can be equipped with the same fragrance, making it a booster to the existing fragrance.

The addition of the timer board means that the washroom is being fragranced at regular intervals, giving the area a fresh, clean smell at all times.

Panache - removing bacteria from the washrooms of the world

A well fragranced washroom gives the ultimate perception of cleanliness

Designed to comply with International Electrical Standards

*Patent Pending: Unique Base Plate, Power Defeat Switch, Timer Board

*Patent Pending: Bacteria, Germ and Fragrance Entrapment
