

FRAGRANCE & SUPER-BAC CARTRIDGES

Fragrance Cartridges:

As shown in the in the diagram below the fragrance cartridge is inserted into the tri-filter housing, by snapping open the bottom grill, inserting the fragrance filter pad, snapping shut the bottom.

The fragrance cartridges are changeable on a 30 day cycle

Super-Bac

The Super-Bac cartridge has been designed with two specific purposes in mind.

1. Achieve 95% - 100% bacteria reduction in air blown back on to the hands of the user.
2. Retrofit existing S9 & S10 Hand Dryers

There are approximately 100,000 S9 & S10 units within the Australian / New Zealand Market, which have been distributed and marketed by hygiene companies such as AlSCO Fresh & Clean, NZTS, and Hospeco etc these can all be retrofitted with the Super-Bac Cartridge within minutes.

The process is extremely simple.

1. Open the S9 or S10 Cover
2. Snap fit the Super-Bac cartridge to the existing fan housing
3. Close the unit

You are now blowing 95% - 100% bacteria free air. The introduction of the Super-Bac filter has also reduced noise within the unit.

The Super-Bac cartridges will last for up to 6 months, and can be changed for on a monthly service schedule.

Fig 1 shows the super-bac cartridge disassembled, simply snap fit the components together and then snap into the fan housing.

Fig 2. Shows the Super-Bac Cartridge snap fitted to the fan housing.
